

# Mechatronics Engineer

## Maksim Lovchev

Australian Citizen

Sydney, NSW

0493200194

[lovchevmaks@mail.ru](mailto:lovchevmaks@mail.ru)

<https://www.linkedin.com/in/maksim-lovchev-0026a52ba/>

## Career Objective

Final-year Mechatronics Engineering student at UTS with hands-on experience in robotics, computer vision, and embedded systems. Seeking opportunities in robotics and perception engineering – open to both industry and research roles.

## EDUCATION

### Bachelor of Engineering (Honours)

University of Technology Sydney

Feb 2023 – Nov 2026

- Majoring in Mechatronics
- Distinction average (WAM 81.07)
- [Multiple outstanding projects nominated for UTS Tech Festival](#) (details on LinkedIn)

### Certificate IV in Tertiary Preparation

TAFE NSW

Feb 2022 – Nov 2022

- TES score (analogue to ATAR)– 291/300

### Graduate Certificate of Secondary Education

Moscow Region High School (MBGEI “Lyceum”)

Sep 2019 – June 2021

- Was awarded an Educational Excellence Medal for achieving the maximum score for each of the 11 years of education.

## Work experience

### Robotics Intern (Internship)

University of Technology Sydney: Robotics Institute

Jan 2026 – May 2026

- Developed a computer vision and perception pipeline for agricultural environments on NVIDIA Jetson Orin Nano
- Prepared and curated large datasets of RGBD fused images
- Performed model training, evaluation, and optimisation
- Participated in field trials to validate system performance in real agricultural conditions

### Casual Academic (Casual)

University of Technology Sydney

Aug 2025 - present

- Tutoring in weekly classes of over 100 students in Faculty of Engineering and IT
- Assisting students with subject material and assessment work

- Marking of face-to-face and online assignments
- Providing guidance and supporting students with individual projects on mechatronics systems

**Bartender (Part-time)**  
**Jordon's Seafood**

**Feb 2023 - present**

- Resolved rising conflicts and misunderstandings between house staff and guests
- Prepared and served drinks with maximum productivity and consistent high quality
- Took on additional responsibilities working as a waiter and carrying other essential roles in the restaurant

**Night fill team member (Casual)**  
**Woolworths / Woolworths Metro**

**April 2022 – Nov 2025**

- Worked in very high-pace environment, maintaining mental focus and following safety procedures
- Trained new staff to gain proficiency in short periods of time using my advanced communication skills

**Warehouse labourer (Casual)**  
**WaterRower Australia**

**Oct 2021 – Dec 2021**

- Organised warehouse space in conditions of its shortage
- Manually unloaded of shipping containers (up to 40ft long) with goods

## Skills

**Languages:** C++, MATLAB, Python, Java

**Frameworks:** ROS2, JavaFX

**Software:** Altium Designer, Arduino IDE, Visual Studio Code, Solidworks, Autodesk Fusion, STMCube IDE, Intel Quartus Prime, MS Office (Excel, Word, Outlook, PowerPoint)

**Hardware:** NVIDIA Jetson, MCUs (ESP32, STM32, Arduino), analogue sensors (accelerometer, photoresistors), LCD screens, FPGA Cyclone IV

**Transferable:** Teamwork and communication: proven track record leading multiple engineering team projects (details on LinkedIn)

Independent ownership: scoped, developed, and delivered a full computer vision pipeline end-to-end as the sole intern on the project

Languages: native Russian, fluent English
